Adhithya Mohan S

B.Tech Electronics & Communication Engineering · 2nd Year

Mar Baselios College of Engineering and Technology, Thiruvananthapuram

+91 95390 66643 · adhithyamohan2312@gmail.com · linkedin.com/in/adhithya-mohan-s

OBJECTIVE

Motivated Electronics & Communication Engineering undergraduate with a strong foundation in embedded systems, sensor technologies, and IoT — seeking an internship at a reputed government organization or prestigious research institution to apply technical knowledge to meaningful, real-world challenges. Brings a unique blend of technical rigor, creative leadership, and a multidisciplinary outlook developed through research projects, institutional roles, and independent development work.

EDUCATION

B.Tech — Electronics & Communication Engineering
2024 - 2028

Mar Baselios College of Engineering and Technology, Thiruvananthapuram | CGPA: 8.02 / 10.0

Higher Secondary (Class XII — Science Stream)
2023 - 2024

Central Board of Secondary Education (CBSE) | 86%

TECHNICAL SKILLS

Programming	Python, C, JavaScript (Basic), CSS (Basic), MATLAB
Embedded Systems	ARM Microcontroller Programming, 8051 Microcontroller Programming, LTspice Circuit Simulation
Electronics & IoT	PIR & IR Sensors, Embedded C, Signal Processing, Circuit Design & Analysis
Web Development	Frontend Development, Full-Stack (Beginner), Website Deployment
Design & Media	Figma, Adobe Photoshop, Poster Design, Photography, Color Science
Tools & Platforms	Git, VS Code, LTspice, MATLAB, AI-Assisted (Vibe) Coding

TECHNICAL PROJECTS

Intelligent Traffic Management System for Emergency Response
2024

Embedded Systems · Microcontrollers · IoT

- Engineered a smart traffic control system that detects approaching emergency vehicles using a specialized module for ambulances and integration of AI into traffic lights, automatically pre-clearing signal corridors to reduce ambulance response times.
- Implemented real-time sensor fusion and decision logic on a microcontroller platform, demonstrating applied skills in Embedded C and hardware integration.

Room Occupancy Monitoring System

2026

PIR Sensors · Microcontroller · ASM Language · IoT

- Developed an automated presence-detection system using Passive Infrared sensors to monitor room occupancy and enable energy-efficient control of lighting and HVAC systems.
- Designed sensor interface circuitry and firmware logic for continuous real-time monitoring with minimal false-positive detection.

LEADERSHIP & CO-CURRICULAR ACTIVITIES

PR & Media Head — ISTE MBCET

2025 – Present

Indian Society for Technical Education, Student Chapter

- Directing all public relations and media communications for the ISTE chapter at Mar Baselios CET, overseeing digital presence, event promotion, and institutional outreach.
- Served as Media Head for the 24th edition of the ISTE All Kerala Annual Student Convention — managing media coverage, content production, and cross-team coordination for one of Kerala's most prominent student technical conventions.
- Conceptualized and produced all promotional posters, social media content, and visual collaterals across multiple large-scale college events.

Creative Curator — FRAMES Photography Club, MBCET

2025 – Present

- Curating visual storytelling projects and directing photography initiatives for the college photography club.
- Intermediate-level photographer with in-depth knowledge of color science, exposure theory, composition principles, and post-processing workflows.
- Won multiple prizes in inter-collegiate and open photography competitions, recognized for creative vision and technical execution.

Web Developer — ISTE MBCET

2026

- Single-handedly designed and deployed the official website for the ISTE MBCET student chapter, handling architecture, frontend development, and go-live deployment.

ACHIEVEMENTS

- District-Level Qualifier — Young Innovators Programme (YIP) 2026: Conceptualized an agri-tech mobile application designed to re-engage youth in agriculture and modernize the farming sector through digital tools and community-driven features.
- Prize Winner in Photography Competitions — recognized across multiple events for creative composition, color work, and technical photography skills.
- Recognized for excellence in design across ISTE MBCET events; poster and media work reached state-level visibility at the All Kerala Student Convention.
- Proficient in AI-assisted (vibe) coding — applied in personal projects and club initiatives to accelerate prototyping and delivery.

AREAS OF INTEREST

Embedded & IoT Systems · Space & Satellite Technology · Sensor Fusion & Signal Processing · Frontend & Full-Stack Development · Photography & Visual Design · Agri-Tech Innovation
